Editorial Review

From the Author
AI4U (Artificial Intelligence for You) was published in 2002 with each chapter describing one of the thirty-four (34) mind-modules then included in the Forth and JavaScript AI Minds. The AI software was not yet bug-free or consistently functional. In 2008 the software began really to think and to express simple ideas in the subject-verb-object (SVO) format. Meanwhile, the names of the mind-modules were changed slightly to conform with the wiki-page requirements of the Google Code MindForth project (q.v.), so that any mention of a mind-module, such as InFerence, became a clickable link anywhere on a wiki-page. A new feature of neural inhibition was included in the AI Minds so that any new thought would fade briefly away and let a different thought emerge in the AI consciousness. In late 2011, the independent scholarship in artificial intelligence branched out into the Russian language with the Dushka AI Mind in JavaScript and into the German language with the Wotan AI Mind in Win32Forth or 64-bit iForth for Linux supercomputers. In late 2012, a new feature was added for automated reasoning with the InFerence mind-module -- about which an Amazon Kindle e-book (q.v.) was published on 1 October 2013 with a line-by-line explanation of the Forth code for inference. On 24 November 2013 the Amazon Kindle e-book *Artificial Intelligence in German* was published as a kind of update to the *AI4U* book and with the inclusion of the Wotan German AI Forth code -- which made the fractional free preview display almost the entire editorial (non-code) content of the AI-in-German e-book. In summation, eleven years later the AI in AI4U is still going strong not only in English but also in German and in Russian.
