Emile Durkheim: Selected Writings By Emile Durkheim

This 1972 book is a collection of Durkheim's writings drawing upon the whole body of his work. Dr Giddens takes his selections from a wide variety of sources and includes a number of items from untranslated writings in the Revue Philosophique, Annee Sociologique and from L'evolution pedagogue en France. Selections from previously translated writings have been checked against the originals and amended or re-translated where necessary. Dr Giddens arranges his selections thematically rather than chronologically. However, extracts from all phases of Durkheim's intellectual career are represented, giving the date of their first publication, which makes the evolution of his thought easily traceable. In his introduction Dr Giddens discusses phases in the interpretation of Durkheim's thought, as well as the main themes in his work, with an analysis of the effects of his thinking on modern sociology. The book is for students at any level taking courses in sociology, social anthropology and social theory in which Durkheim is one of the major writers studied.
