Science Was Wrong: Startling Truths About Cures, Theories, and Inventions "They" Declared Impossible (English and English Edition) By Stanton T. Friedman MSc, Kathleen Marden

Two months before the Wright brothers' historic flight at Kitty Hawk, a top scientist declared that "no possible combination of known substances, known forces of machinery and known forms of force can be united in a practical [flying] machine..." Germ theory was first advanced in ancient anskrit texts thousands of years ago, but wasn't widely accepted until late in the 19th century. Space travel was declared "utter bilge" in 1956 by the British astronomer Royal, one of a long line of scientists who "proved" it was impossible. Throughout history, it has been difficult, even impossible, to promote the acceptance of new discoveries. Yet during the last two centuries, there has been a veritable explosion of new cures, theories, techniques, and inventions that have revolutionized aviation, space travel, communications, medicine, and warfare. Most of them, of course, were deemed "impossible." Science Was Wrong is a fascinating collection of stories about the pioneers who created or thought up the "impossible" cures, theories, and inventions "they" said couldn't work. How many have suffered or died because cures weren't accepted? How many inventions have been quashed? How much progress was delayed or denied? You will end up shaking your head in disbelief and even disgust as you learn the answers.

Editorial Review

Review
"Stanton Friedman and Kathleen Marden offer example after example of what happens when good people fail to step back and look at not only the details, but the big picture. Sometimes it's those we love most who we chastise hardest, and in the case of this book, the authors' love for scientists and the scientific community is evident in this epic wake-up call." --George Noory, host, Coast to Coast AM

"When considering the historical record of scientific experts, from their views on manned flight and atom bombs to germs and Global Warming, the one constant seems to be that mostly they were wrong. Perhaps it is time for the public to consider alternative sources of information, such as this book." --Jim Marrs, author of the New York Times best-sellers Crossfire and Rule by Secrecy

"When considering the historical record of scientific experts, from their views on manned flight and atom bombs to germs and Global Warming, the one constant seems to be that mostly they were wrong. Perhaps it is time for the public to consider alternative sources of information, such as this book." --Jim Marrs, author of the New York Times best-sellers Crossfire and Rule by Secrecy

About the Author
Stanton T. Friedman received his BSc and MSc degrees in physics from the University of Chicago. He was employed for 14 years as a nuclear physicist by major industrial companies working in highly advanced, classified nuclear programs and is the author of Flying Saucers and Science and coauthor of Captured! The Betty and Barney Hill UFO Experience. Friedman has appeared on hundreds of radio and TV programs, including four times on Larry King Live and in many documentaries. He lives in Canada.

Kathleen Marden was trained as a social scientist and educator and holds a BA from the University of New Hampshire. For 10 years she served as the international director of field investigator training for the Mutual UFO Network. A coauthor of Captured! Marden has appeared in many television documentaries and radio programs and lectured throughout the United States. She resides in Stratham, New Hampshire.

Users Review

From reader reviews:

Kevin Burkes:
