From the Inside Flap

Architect's Handbook of Construction Detailing

David Kent Ballast, Faia, csi

Second Edition

From the Back Cover
Ready-to-use information about the most critical building details

The *Architect's Handbook of Construction Detailing, Second Edition* provides architects, interior designers, contractors, students, and others in the construction industry with a convenient source of detailing and specification information on hundreds of commonly used details and materials. Keep the *Handbook* at your desk to help solve specific problems, as the basis for developing a master detail system, or as a reference for checking existing drawings and specifications.

Significantly updated with revisions to nearly all details, the *Second Edition* focuses on the key areas where you are most likely to encounter problems, such as exterior cladding, roofing, doors, and masonry. Featuring thoroughly redrawn illustrations and the latest industry standard references, the new edition now includes:

- A thorough profile of each detail: description, detailing considerations, coordination required, material requirements, installation requirements, tolerance coordination, and likely failure points
- Details revised to reflect new technologies and more stringent energy conservation requirements
- New sections on concrete with insulation, autoclaved aerated concrete, glass fiber-reinforced concrete panels, precast concrete with insulation, multistory wood framing, and more
- A keynoting system updated to the new 6-digit *MasterFormat*™ numbering systems

Regardless of how you use this book, you will find it to be a time-saving reference that can minimize errors and improve the technical documentation of your projects.
