Developmental Mathematics: Basic Math and Algebra Plus NEW MyMathLab with Pearson eText -- Access Card Package (3rd Edition) (Lial Developmental Math Series) By Margaret L. Lial, John Hornsby, Terry McGinnis, Stanley A. Salzman, Diana L. Hestwood

ALERT: Before you purchase, check with your instructor or review your course syllabus to ensure that you **select the correct ISBN**. Several versions of Pearson's MyLab & Mastering products exist for each title, including customized versions for individual schools, and registrations are not transferable. In addition, **you may need a CourseID**, provided by your instructor, to register for and use Pearson's MyLab & Mastering products.

Packages
Access codes for Pearson's MyLab & Mastering products may not be included when purchasing or renting from companies other than Pearson; check with the seller before completing your purchase.

Used or rental books
If you rent or purchase a used book with an access code, the access code may have been redeemed previously and you may have to purchase a new access code.

Access codes
Access codes that are purchased from sellers other than Pearson carry a higher risk of being either the wrong ISBN or a previously redeemed code. Check with the seller prior to purchase.

--

The **Lial Series** has helped thousands of students succeed in developmental mathematics by providing the best learning and teaching support to students and

instructors.

This package consists of the textbook plus an access kit for MyMathLab/MyStatLab.

MyMathLab provides a wide range of homework, tutorial, and assessment tools that make it easy to manage your course online.

Editorial Review

About the Author

Marge Lial (late) became interested in math at an early age—it was her favorite subject in the first grade! Marge's intense desire to educate both her students and herself inspired the writing of numerous best-selling textbooks. Marge, who received Bachelor's and Master's degrees from California State University at Sacramento, was affiliated with American River College. An avid reader and traveler, her travel experiences often found their way into her books as applications, exercise sets, and feature sets. She was particularly interested in archeology; trips to various digs and ruin sites produced some fascinating problems for her textbooks involving such topics as the building of Mayan pyramids and the acoustics of ancient ball courts in the Yucatan. We dedicate the new editions of the paperback developmental math series to Marge in honor of her contributions to the field in which she helped thousands of students succeed.

When **John Hornsby** enrolled as an undergraduate at Louisiana State University, he was uncertain whether he wanted to study mathematics education or journalism. His ultimate decision was to become a teacher, but after twenty-five years of teaching at the high school and university levels and fifteen years of writing mathematics textbooks, both of his goals have been realized. His love for both teaching and for mathematics is evident in his passion for working with students and fellow teachers as well. His specific professional interests are recreational mathematics, mathematics history, and incorporating graphing calculators into the curriculum. John's personal life is busy as he devotes time to his family (wife Gwen, and sons Chris, Jack, and Josh). He has been a rabid baseball fan all of his life. John's other hobbies include numismatics (the study of coins) and record collecting. He loves the music of the 1960s and has an extensive collection of the recorded works of Frankie Valli and the Four Seasons.

A native Midwesterner, **Terry McGinnis** received her Bachelor’s of Science in Elementary Education with a concentration in Mathematics from Iowa State University. She has taught elementary and middle school mathematics, and developed and implemented the curriculum used with her students. Terry has been involved in college mathematics publishing for over 20 years, working with a variety of authors on textbooks in developmental mathematics and precalculus. After working behind the scenes on many of the Lial/Hornsby textbooks and supplements for over 10 years, Terry joined Margaret Lial and John Hornsby in 2002 as coauthor of their developmental mathematics series that includes *Introductory Algebra, Intermediate Algebra,* and *Introductory and Intermediate Algebra*. When not working, Terry enjoys spinning at a local health club, walking, and reading fiction. She is the devoted mother of two sons, Andrew and Tyler.

Diana Hestwood lives in Minnesota and has taught at Metropolitan Community College in Minneapolis for two decades. She has done research on the student brain and is an expert on study skills. She is the author of Lial/Hestwood’s *Prealgebra* and coauthor of Lial/Salzman/Hestwood’s *Basic Math* and Lial/Hestwood/Hornsby/McGinnis’s *Prealgebra and Introductory Algebra*.

Stan Salzman is a long time resident of Sacramento, California. Stan has taught at American River College for many years, where he was a member of the business department. He is the author of *Business Math* and *Essential Math*, published by Pearson Education, Inc., and is coauthor of *Basic Math*.

Users Review

From reader reviews:

Helen Wright:

Within other case, little folks like to read book Developmental Mathematics: Basic Math and Algebra Plus NEW MyMathLab with Pearson eText -- Access Card Package (3rd Edition) (Lial Developmental Math Series). You can choose the best book if you'd prefer reading a book. Providing we know about how is important a book Developmental Mathematics: Basic Math and Algebra Plus NEW MyMathLab with Pearson eText -- Access Card Package (3rd Edition) (Lial Developmental Math Series). You can add expertise and of course you can around the world by just a book. Absolutely right, because from book you can realize everything! From your country until finally foreign or abroad you can be known. About simple matter until wonderful thing you could know that. In this era, we could open a book or searching by internet unit. It is called e-book. You should use it when you feel weary to go to the library. Let's examine.

Holly Silva:

This Developmental Mathematics: Basic Math and Algebra Plus NEW MyMathLab with Pearson eText -- Access Card Package (3rd Edition) (Lial Developmental Math Series) are reliable for you who want to become a successful person, why. The main reason of this Developmental Mathematics: Basic Math and Algebra Plus NEW MyMathLab with Pearson eText -- Access Card Package (3rd Edition) (Lial Developmental Math Series) can be one of many great books you must have is usually giving you more than just simple studying food but feed you with information that probably will shock your earlier knowledge. This book will be handy, you can bring it everywhere and whenever your conditions in the e-book and printed kinds. Beside that this Developmental Mathematics: Basic Math and Algebra Plus NEW MyMathLab with Pearson eText -- Access Card Package (3rd Edition) (Lial Developmental Math Series) giving you an enormous of experience including rich vocabulary, giving you trial of critical thinking that could it useful in your day activity. So , let's have it appreciate reading.

Dione Wicker:

Reading a guide can be one of a lot of task that everyone in the world likes. Do you like reading book consequently. There are a lot of reasons why people love it. First reading a publication will give you a lot of new details. When you read a book you will get new information mainly because book is one of numerous ways to share the information or maybe their idea. Second, studying a book will make anyone more imaginative. When you reading a book especially fiction book the author will bring someone to imagine the story how the character types do it anything. Third, you are able to share your knowledge to others. When you read this Developmental Mathematics: Basic Math and Algebra Plus NEW MyMathLab with Pearson eText -- Access Card Package (3rd Edition) (Lial Developmental Math Series), you can tells your family, friends in addition to soon about yours reserve. Your knowledge can inspire average, make them reading a guide.

Catherine Hershey:

Many people spending their moment by playing outside together with friends, fun activity along with family or just watching TV the whole day. You can have new activity to spend your whole day by looking at a book. Ugh, do you consider reading a book can actually hard because you have to bring the book everywhere? It fine you can have the e-book, taking everywhere you want in your Smartphone. Like Developmental Mathematics: Basic Math and Algebra Plus NEW MyMathLab with Pearson eText -- Access Card Package (3rd Edition) (Lial Developmental Math Series) which is obtaining the e-book version. So , why not try out this book? Let's see.
