Introduction to Mathematical Logic: Set Theory Computable Functions Model Theory (Undergraduate Texts in Mathematics) By Jerome Malitz

This book is intended as an undergraduate senior level or beginning graduate level text for mathematical logic. There are virtually no prere quisites, although a familiarity with notions encountered in a beginning course in abstract algebra such as groups, rings, and fields will be useful in providing some motivation for the topics in Part III. An attempt has been made to develop the beginning of each part slowly and then to gradually quicken the pace and the complexity of the material. Each part ends with a brief introduction to selected topics of current interest. The text is divided into three parts: one dealing with set theory, another with computable function theory, and the last with model theory. Part III relies heavily on the notation, concepts and results discussed in Part I and to some extent on Part II. Parts I and II are independent of each other, and each provides enough material for a one semester course. The exercises cover a wide range of difficulty with an emphasis on more routine problems in the earlier sections of each part in order to familiarize the reader with the new notions and methods. The more difficult exercises are accompanied by hints. In some cases significant theorems are devel oped step by step with hints in the problems. Such theorems are not used later in the sequence.

Users Review

From reader reviews:

Gary Lafountain:

Hey guys, do you wants to finds a new book to see? May be the book with the headline Introduction to Mathematical Logic: Set Theory Computable Functions Model Theory (Undergraduate Texts in Mathematics) suitable to you? The particular book was written by famous writer in this era. Often the book untitled Introduction to Mathematical Logic: Set Theory Computable Functions Model Theory (Undergraduate Texts in Mathematics)is a single of several books that will everyone read now. This specific book was inspired lots of people in the world. When you read this e-book you will enter the new way of measuring that you ever know just before. The author explained their concept in the simple way, so all of people can easily to understand the core of this e-book. This book will give you a lot of information about this world now. So you can see the represented of the world within this book.

Debra Sims:

The reason why? Because this Introduction to Mathematical Logic: Set Theory Computable Functions Model Theory (Undergraduate Texts in Mathematics) is an unordinary book that the inside of the reserve waiting for you to snap this but latter it will surprise you with the secret that inside. Reading this book beside it was fantastic author who also write the book in such remarkable way makes the content inside easier to understand, entertaining method but still convey the meaning completely. So , it is good for you because of not hesitating having this anymore or you going to regret it. This amazing book will give you a lot of benefits than the other book possess such as help improving your proficiency and your critical thinking means. So , still want to delay having that book? If I were being you I will go to the e-book store hurriedly.

Donald Corbett:

Introduction to Mathematical Logic: Set Theory Computable Functions Model Theory (Undergraduate Texts in Mathematics) can be one of your nice books that are good idea. All of us recommend that straight away because this reserve has good vocabulary which could increase your knowledge in terminology, easy to understand, bit entertaining however delivering the information. The author giving his/her effort to place every word into pleasure arrangement in writing Introduction to Mathematical Logic: Set Theory Computable Functions Model Theory (Undergraduate Texts in Mathematics) although doesn't forget the main point, giving the reader the hottest and based confirm resource facts that maybe you can be considered one of it. This great information can easily drawn you into brand-new stage of crucial considering.

James Wood:

Are you kind of hectic person, only have 10 or 15 minute in your time to upgrading your mind talent or thinking skill even analytical thinking? Then you have problem with the book in comparison with can satisfy your small amount of time to read it because this all time you only find reserve that need more time to be study. Introduction to Mathematical Logic: Set Theory Computable Functions Model Theory (Undergraduate Texts in Mathematics) can be your answer since it can be read by a person who have those short extra time problems.
