Criminology By Chris Hale, Keith Hayward, Azrini Wahidin, Emma Wincup

Few subjects provoke as much public fascination and political concern as crime and criminality. Criminology is an ideal textbook for undergraduate students approaching the subject for the first time. It examines a wide range of topics, including historical and contemporary understandings of crime and criminal justice; different forms of crime - from street crime to state crime; who commits crime and who are the victims of crime; and how society and state agencies respond to crime and disorder.

The contributions to this book offer clear, accessible introductions to the main topics and issues of criminology. Questions, summaries, further reading guidance, useful web links, and tables and diagrams can be found throughout. The third edition includes contributions from six new authors and contains new chapters on cybercrime, and 'crime, culture, and everyday life'.
