Conservation of Historic Buildings By Bernard Feilden

Since its publication in 1982 Sir Bernard Feilden's Conservation of Historic Buildings has become the standard text for architects and others involved in the conservation of historic structures. Leading practitioners around the world have praised the book as being the most significant single volume on the subject to be published. This third edition revises and updates a classic book, including completely new sections on conservation of Modern Movement buildings and non-destructive investigation.

The result of the lifetime's experience of one of the world's leading architectural conservators, the book comprehensively surveys the fundamental principles of conservation in their application to historic buildings, and provides the basic information needed by architects, engineers and surveyors for the solution of problems of architectural conservation in almost every climatic region of the world. This edition is organized into three complementary parts: in the first the structure of buildings is dealt with in detail; the second focuses attention on the causes of decay and the materials they affect; and the third considers the practical role of the architect involved in conservation and rehabilitation. As well as being essential reading for architects and others concerned with conservation, many lay people with various kinds of responsibility for historic buildings will find this clearly written, jargon-free work a fruitful source of guidance and information.

Editorial Review

Review
Reviews of previous editions:

'There must be many well thumbed copies of the first edition of this highly regarded book on the shelves of older members of EASA because upon its first publication in 1982 it quickly established itself as a standard work of reference and information. It keeps its rightful place as a most readable and stimulating book and anyone who aspires to a professional standard of excellence in the field can hardly do without owning a copy.' - EASA Newsletter

'Bernard Feilden is a monument to conservation.'
John Fidler - The Architect's Journal

'Is it a book to buy? Definitely. It is an icon and a classic of its kind; but more importantly, it is a true working book. Students will use it to garner the essential knowledge they need, the experienced professional will use it as an aide memoire.' - ASCHB Newsletter

From the Publisher
The result of the lifetime's experience of one of the world's leading architectural conservators, the book comprehensively surveys the fundamental principles of conservation in their application to historic buildings, and provides the basic information needed by architects, engineers and surveyors for the solution of problems of architectural conservation in almost every climatic region of the world. This softcover edition is organized into three complementary parts: in the first the structure of buildings is dealt with in detail; the second focuses attention on the causes of decay and the materials they affect; and the third considers the practical role of the architect involved in conservation and rehabilitation. As well as being essential reading for architects and others concerned with conservation, many lay people with various kinds of responsibility for historic buildings will find this clearly written, jargon-free work a fruitful source of guidance and information.

Users Review

From reader reviews:

Anthony Wood:

Within other case, little persons like to read book Conservation of Historic Buildings. You can choose the best book if you like reading a book. As long as we know about how is important some sort of book Conservation of Historic Buildings. You can add information and of course you can around the world by just a book. Absolutely right, due to the fact from book you can learn everything! From your country until eventually foreign or abroad you will end up known. About simple factor until wonderful thing you could know that. In this era, you can open a book or maybe searching by internet unit. It is called e-book. You need to use it when you feel weary to go to the library. Let's learn.

Adrian Johnson:

What do you with regards to book? It is not important together with you? Or just adding material if you want something to explain what you problem? How about your extra time? Or are you busy particular person? If you don't have spare time to perform others business, it is give you a sense of feeling bored faster. And you have spare time? What did you do? Everyone has many questions above. The doctor has to answer that question because just their can do in which. It said that about reserve. Book is familiar on every person. Yes, it is correct. Because start from on guardería until university need that Conservation of Historic Buildings to read.

Carmela Martin:

Here thing why this Conservation of Historic Buildings are different and trusted to be yours. First of all reading a book is good but it really depends in the content of it which is the content is as yummy as food or not. Conservation of Historic Buildings giving you information deeper as different ways, you can find any e-book out there but there is no book that similar with Conservation of Historic Buildings. It gives you thrill looking at journey, its open up your own eyes about the thing in which happened in the world which is might be can be happened around you. You can actually bring everywhere like in park, café, or even in your method home by train. Should you be having difficulties in bringing the branded book maybe the form of Conservation of Historic Buildings in e-book can be your alternate.

Rodolfo Born:

This Conservation of Historic Buildings is new way for you who has curiosity to look for some information given it relief your hunger details. Getting deeper you upon it getting knowledge more you know or perhaps you who still having small amount of digest in reading this Conservation of Historic Buildings can be the light food for you personally because the information inside this book is easy to get by simply anyone. These books build itself in the form that is certainly reachable by anyone, yep I mean in the e-book application form. People who think that in guide form make them feel tired even dizzy this e-book is the answer. So there isn't any in reading a e-book especially this one. You can find actually looking for. It should be here for you actually. So , don't miss the idea! Just read this e-book sort for your better life along with knowledge.
