## Editorial Review

From the Back Cover

Mathematics from a Christian perspective

With respect for the history and ever-changing applications of mathematicalprinciples, James Bradley and Russell Howell, along with a team of fellowscholars, invite readers to consider the rich intersection of mathematics andChristian belief. Citizens of the twenty-first century generally believe that mathematics is all about numbers and formulas, with no religious significance—an attitude that belies the faith-based work of thinkers from Plato to Newton.It is time to reawaken our sensitivity to the vital spiritual matters raised bythe study of mathematics, a discipline that demands profound thought andhelps us understand the beauty and the order of our physical world.

*Mathematics Through the Eyes of Faith* explores questions such as:

- What is the relationship between chance and divine providence?
- Do concepts like infinity point beyond themselves to a higher reality?
- Is mathematics discovered or invented, and why is it effective in the sciences?

This comprehensive work, one in a series of cosponsored by the Council for Christian Colleges & Universities, is designed to help students and teachers understand how mathematics has evolved and how the interplay of mathematics and Christian belief can enrich the study of both.

About the Author

Russell Howell is a professor of mathematics at Westmont College.

James Bradley is a professor emeritus of mathematics at Calvin College.

## Users Review

**From reader reviews:**

**Marvin Perdue:**

Have you spare time for any day? What do you do when you have a lot more or little spare time? That's why, you can choose the suitable activity for spend your time. Any person spent their very own spare time to take a go walking, shopping, or went to typically the Mall. How about open or even read a book eligible Mathematics Through the Eyes of Faith (Through the Eyes of Faith Series)? Maybe it is being best activity for you. You understand beside you can spend your time together with your favorite's book, you can smarter than before. Do you agree with its opinion or you have other opinion?

**Mark Blanding:**
