Motor Learning and Control: Concepts and Applications By Richard Magill

The text provides an introductory study of motor learning and control for students who aspire to become practitioners in exercise science, physical education, and other movement-oriented professions. Magill opens with an introduction to motor skills and control, continues through attention, memory, and learning, and ends with a discussion of instruction, feedback, and practice methods. The text's strong research base, clear presentation and practical applications will help students build a solid foundation in motor skills and prepare them for further exploration on their own.
