Peirce and Biosemiotics: A Guess at the Riddle of Life From Ingramcontent

This volume discusses the importance of Peirce´s philosophy and theory of signs to the development of Biosemiotics, the science that studies the deep interrelation between meaning and life. Peirce considered semeiotic as a general logic part of a complex architectonic philosophy that includes mathematics, phenomenology and a theory of reality. The authors are Peirce scholars, biologists, philosophers and semioticians united by an interdisciplinary endeavor to understand the mysteries of the origin of life and its related phenomena such as consciousness, perception, representation and communication.

Editorial Review

From the Back Cover
This volume discusses the importance of Peirce´s philosophy and theory of signs to the development of Biosemiotics, the science that studies the deep interrelation between meaning and life. Peirce considered semeiotic as a general logic part of a complex architectonic philosophy that includes mathematics, phenomenology and a theory of reality. The authors are Peirce scholars, biologists, philosophers and semioticians united by an interdisciplinary endeavor to understand the mysteries of the origin of life ands its related phenomena such as consciousness, perception, representation and communication.

About the Author

Vinicius Romanini, Ph.D., is Professor of Communication Studies at the School of Communications and Arts, University of Sao Paulo (USP), Brazil. His research interest is focused on the development of Peirce´s semeiotic into a transdisciplinary theory of Communication. He is the scientific editor of Semeiosis – Transdisciplinary Journal of Semiotics, member of the CLE research group on self-organization at UNICAMP and of the International Advisory Committee (IAC) for the Peirce Society.

Eliseo Fernández was born and educated in Argentina. He works at the Linda Hall Library of Science and Technology as a scientific consultant and taught at the University of Missouri at Kansas City for 18 years at the Physics Department. He has lectured and published papers and reviews on topics in the philosophy and history of science and on the thought of C. S. Peirce. His current research focuses on the application of some ideas of Peirce to current philosophical problems in physics and bio semiotics.

Users Review
