Introduction to Research: Understanding and Applying Multiple Strategies, 4e (Depoy, Introduction to Research) By Elizabeth DePoy, Laura N. Gitlin

Bridge the gap between research and practice with DePoy and Gitlin's **Introduction to Research: Understanding and Applying Multiple Strategies, 4th Edition.** This completely updated, user-friendly text helps you better understand not only the research process, but also research designs and their applications to the real world of clinical practice. Covering multiple research strategies (including both qualitative and quantitative research), it gives you a balanced approach to various research traditions, addressing emerging key issues in today's health care environment.

- Offers a **balanced approach to various research methods** and multiple research strategies, including qualitative, quantitative, naturalistic and experimental-type, and more.
- Presents complex information in a **clear, highly readable, and easy-to-understand** manner.
- Keeps information relevant to today's health care environment with **real-world "snapshots"** and a final *Stories from the Field* chapter.
- Includes **detailed discussions of qualitative and quantitative methodologies**, a unique and balanced focus that makes this text more comprehensive than others in its field.
- Covers **experimental-type, naturalistic, and mixed method design strategies**, improving your ability to compare, contrast, and integrate different methods.
- **Evolve online resources** include statistics math tips to accompany Chapter 19, crossword puzzles, useful weblinks, and sample forms.

- Reflects recent changes in the field, including **new material on preparing poster presentations, community and participatory research, translation issues, and advanced scale development,** giving you the tools you need to devise successful research studies.
- Includes **expanded evidence-based material and occupational therapy-specific information**, discussing the methods used in each study.

Editorial Review

Review

"Providing a bridge between research and practice, this text for undergraduate and advanced students in the health and human services helps readers develop their clinical intuition to inform research, thinking, and action. Early chapters cover philosophical foundations and offer guidelines on reviewing the literature and formulating research questions. Design approaches are then described, covering both experimental-type designs and naturalistic inquiry designs, and practical actions are explained, such as setting the boundaries of a study, collecting info, and statistical analysis. Stories from the authors' own research practice demonstrate how to improve practice through inquiry. This fourth edition contains new material on ethics and informed consent documentation, and a new chapter on seeking financial support for research ideas, plus practical hints for getting started writing a research proposal. A student website offers background on statistics, web links, sample forms, and reference lists linked to PubMed abstracts. DePoy teaches interdisciplinary disabilities studies and social work at the University of Maine. Gitlin teaches occupational therapy at Thomas Jefferson University."
