The Cosmic Perspective: Stars, Galaxies, and Cosmology (6th Edition) By Jeffrey O. Bennett, Megan O. Donahue, Nicholas Schneider, Mark Voit

Building on a long tradition of effective pedagogy and comprehensive coverage, **The Cosmic Perspective: Stars, Galaxies, and Cosmology , Sixth Edition** provides the most engaging and up-to-date introduction to astronomy for non-science majors. The text provides a wealth of features to help enhance student skill building, including new **Visual Skills Check** end-of-chapter questions that provide an opportunity for students to test their visual interpretation skills, new **Cosmic Context Figures** that help students synthesize key concepts and processes, and a new comprehensive **visual overview of scale** to help students explore the scale of time and space. The **Sixth Edition** has also been fully updated to include the latest astronomical observations, research, and theoretical developments. The text is supported by the most robust package of instructor ancillaries, and **MasteringAstronomy** ™ , the market-leading online tutorial and homework system, has been updated to include a wealth of new content to help students learn and review more efficiently outside of class.

This Volume includes Chapters 1-6, S2-S4, and 14-24 of the main text.

Editorial Review

About the Author

Jeffrey Bennett
Jeffrey Bennett holds a B.A. (1981) in biophysics from the University of California, San Diego, and an M.S. and Ph.D.(1987) in astrophysics from the University of Colorado, Boulder. He has taught at every level from preschool through graduate school, including more than 50 college classes in astronomy, physics, mathematics, and education. He served 2 years as a visiting senior scientist at NASA headquarters, where he created NASA's "IDEAS" program, started a program to fly teachers aboard NASA's airborne bservatories (including the hopefully soon-to-be-flying SOFIA), and worked on numerous educational programs for the Hubble Space Telescope and other space science missions. He also proposed the idea for and helped develop
both the Colorado Scale Model Solar System on the CU-Boulder campus and the VoyageScale Model Solar System on the National Mall in Washington, D.C. (He is pictured here with the model Sun.) In addition to this astronomy textbook, he has written college-level textbooks in astrobiology, mathematics, and statistics; two books for the general public, On the Cosmic Horizon (Pearson Addison-Wesley, 2001) and Beyond UFOs (Princeton University Press, 2008); and an award-winning series of children's books that includes Max Goes to the Moon, Max Goes toMars, Max Goes to Jupiter (coming soon), and Max's Ice Age Adventure. When not working, he enjoys participating in masters swimming and in the daily adventures of life with his wife, Lisa; his children, Grant and Brooke; and his dog, Cosmo. His personal Website is www.jeffreybennett.com < http://www.jeffreybennett.com/ > .

Megan Donahue
Megan Donahue is a professor in the Department of Physics and Astronomy at Michigan State University. Her current research is mainly on clusters of galaxies: their contents-dark matter, hot gas, galaxies, active galactic nuclei-and what they reveal about the contents of the universe and how galaxies form and evolve. She grew up on a farm in Nebraska and received a B.A. in physics from MIT, where she began her research career as an X-ray astronomer. She has a Ph.D. in astrophysics from the University of Colorado, for a thesis on theory and optical observations of intergalactic and intracluster gas. That thesis won the 1993 Trumpler Award from the Astronomical Society for the Pacific for an outstanding astrophysics doctoral dissertation in North America. She continued postdoctoral research in optical and X-ray observations as a Carnegie Fellow at Carnegie Observatories in Pasadena, California, and later as an STScI Institute Fellow at Space Telescope. Megan was a staff astronomer at the Space Telescope Science Institute until 2003, when she joined the MSU faculty. Megan is married to Mark Voit, and they collaborate on many projects, including this textbook and the raising of their children,Michaela, Sebastian, and Angela. Between the births of Sebastian and Angela, Megan qualified for and ran the Boston Marathon. These days,Megan runs, orienteers, and plays piano and bass guitar whenever her children allow it.

Nicholas Schneider
Nicholas Schneider is an associate professor in the Department of Astrophysical and Planetary Sciences at the University
of Colorado and a researcher in the Laboratory for Atmospheric and Space Physics. He received his B.A. in physics and astronomy from Dartmouth College in 1979 and his Ph.D. in planetary science from the University of Arizona in 1988. In 1991, he received the National Science Foundation's Presidential Young Investigator Award. His research interests include planetary atmospheres and planetary astronomy, with a

focus on the odd case of Jupiter's moon Io. He enjoys teaching at all levels and is active in efforts to improve undergraduate astronomy education. Off the job, he enjoys exploring the outdoors with his family and figuring out how things work.

Mark Voit
Mark Voit is a professor in the Department of Physics and Astronomy at Michigan State University. He earned his B.A. in astrophysical sciences at Princeton University and his Ph.D. in astrophysics at the University of Colorado in 1990. He continued his studies at the California Institute of Technology, where he was a research fellow in theoretical astrophysics, and then moved on to Johns Hopkins University as a Hubble Fellow. Before going to Michigan State,Mark worked in the Office of Public Outreach at the Space Telescope, where he developed museum exhibitions about the Hubble Space Telescope and was the scientist behind NASA's HubbleSite. His research interests range from interstellar processes in our own galaxy to the clustering of galaxies in the early universe. He is married to coauthor Megan Donahue, and they try to play outdoors with their three children whenever possible, enjoying hiking, camping, running, and orienteering.Mark is also author of the popular book Hubble Space Telescope: New Views of the Universe.

Users Review

From reader reviews:

Sheri Reagan:

What do you about book? It is not important to you? Or just adding material when you want something to explain what the one you have problem? How about your time? Or are you busy man? If you don't have spare time to do others business, it is gives you the sense of being bored faster. And you have free time? What did you do? Everybody has many questions above. The doctor has to answer that question since just their can do that will. It said that about guide. Book is familiar in each person. Yes, it is suitable. Because start from on pre-school until university need this kind of The Cosmic Perspective: Stars, Galaxies, and Cosmology (6th Edition) to read.

Marni Johnson:

Your reading 6th sense will not betray a person, why because this The Cosmic Perspective: Stars, Galaxies, and Cosmology (6th Edition) guide written by well-known writer who knows well how to make book which can be understand by anyone who have read the book. Written throughout good manner for you, still dripping wet every ideas and creating skill only for eliminate your current hunger then you still skepticism The Cosmic Perspective: Stars, Galaxies, and Cosmology (6th Edition) as good book not merely by the cover but also from the content. This is one publication that can break don't determine book by its handle, so do you still needing a different sixth sense to pick that!? Oh come on your reading sixth sense already alerted you so why you have to listening to an additional sixth sense.

Michael Medellin:

Publication is one of source of know-how. We can add our know-how from it. Not only for students but also native or citizen have to have book to know the change information of year in order to year. As we know those books have many advantages. Beside all of us add our knowledge, could also bring us to around the world. Through the book The Cosmic Perspective: Stars, Galaxies, and Cosmology (6th Edition) we can

acquire more advantage. Don't you to definitely be creative people? To become creative person must prefer to read a book. Just simply choose the best book that suited with your aim. Don't become doubt to change your life with this book The Cosmic Perspective: Stars, Galaxies, and Cosmology (6th Edition). You can more desirable than now.

Richard Graham:

Reading a e-book make you to get more knowledge as a result. You can take knowledge and information from the book. Book is published or printed or descriptive from each source that will filled update of news. In this particular modern era like today, many ways to get information are available for you. From media social including newspaper, magazines, science reserve, encyclopedia, reference book, new and comic. You can add your knowledge by that book. Are you hip to spend your spare time to spread out your book? Or just searching for the The Cosmic Perspective: Stars, Galaxies, and Cosmology (6th Edition) when you required it?
