Deep Learning: Methods and Applications (Foundations and Trends(r) in Signal Processing) By Li Deng, Dong Yu

Deep Learning: Methods and Applications provides an overview of general deep learning methodology and its applications to a variety of signal and information processing tasks. The application areas are chosen with the following three criteria in mind: (1) expertise or knowledge of the authors; (2) the application areas that have already been transformed by the successful use of deep learning technology, such as speech recognition and computer vision; and (3) the application areas that have the potential to be impacted significantly by deep learning and that have been benefitting from recent research efforts, including natural language and text processing, information retrieval, and multimodal information processing empowered by multi-task deep learning. Deep Learning: Methods and Applications is a timely and important book for researchers and students with an interest in deep learning methodology and its applications in signal and information processing. "This book provides an overview of a sweeping range of up-to-date deep learning methodologies and their application to a variety of signal and information processing tasks, including not only automatic speech recognition (ASR), but also computer vision, language modeling, text processing, multimodal learning, and information retrieval. This is the first and the most valuable book for "deep and wide learning" of deep learning, not to be missed by anyone who wants to know the breathtaking impact of deep learning on many facets of information processing, especially ASR, all of vital importance to our modern technological society." - Sadaoki Furui, President of Toyota Technological Institute at Chicago, and Professor at the Tokyo Institute of Technology.

Editorial Review

Users Review

From reader reviews:

Calvin Lee:

As people who live in typically the modest era should be up-date about what going on or data even knowledge to make these people keep up with the era that is certainly always change and advance. Some of you maybe will probably update themselves by studying books. It is a good choice to suit your needs but the problems coming to you is you don't know which one you should start with. This Deep Learning: Methods and Applications (Foundations and Trends(r) in Signal Processing) is our recommendation to cause you to keep up with the world. Why, as this book serves what you want and wish in this era.

Angela Strange:

Nowadays reading books are more than want or need but also be a life style. This reading habit give you lot of advantages. The advantages you got of course the knowledge your information inside the book in which improve your knowledge and information. The details you get based on what kind of reserve you read, if you want have more knowledge just go with schooling books but if you want really feel happy read one along with theme for entertaining including comic or novel. Often the Deep Learning: Methods and Applications (Foundations and Trends(r) in Signal Processing) is kind of e-book which is giving the reader capricious experience.

Mary Peterson:

Precisely why? Because this Deep Learning: Methods and Applications (Foundations and Trends(r) in Signal Processing) is an unordinary book that the inside of the reserve waiting for you to snap that but latter it will shock you with the secret the item inside. Reading this book alongside it was fantastic author who also write the book in such wonderful way makes the content on the inside easier to understand, entertaining method but still convey the meaning thoroughly. So , it is good for you for not hesitating having this ever again or you going to regret it. This unique book will give you a lot of positive aspects than the other book include such as help improving your skill and your critical thinking technique. So , still want to hold off having that book? If I have been you I will go to the publication store hurriedly.

Charlotte Neville:

Playing with family within a park, coming to see the coastal world or hanging out with good friends is thing that usually you may have done when you have spare time, and then why you don't try issue that really opposite from that. Just one activity that make you not sensation tired but still relaxing, trilling like on roller

coaster you are ride on and with addition details. Even you love Deep Learning: Methods and Applications (Foundations and Trends(r) in Signal Processing), you could enjoy both. It is very good combination right, you still need to miss it? What kind of hang-out type is it? Oh can happen its mind hangout fellas. What? Still don't buy it, oh come on its known as reading friends.
